Profile

I'm a results-driven **Engineering Manager / fractional CTO** with 10+ years of experience leading and developing innovative software projects that enhance efficiency, drive user engagement, and meet investor expectations. I'm prepared to jump into your organization head-first - ensuring your technology assets meet the requirements of your business plan.

Recent Projects

Head of Development, Centreville Tech LLC

December 2015 – Present

- Lead development of **DNA S.A.M.M.I.E**, a [logistics platform](#) for real-time cargo tracking and predictive analytics.
- Lead development of **React Mobile**, an [emergency alert safety app](#) and [corresponding dispatch console](#).
- Lead development of **Planet Fundraiser**, a [mobile app that simplifies charitable contributions](#).
- Lead Development of the **Haven Today** [mobile app for radio program playback](#).

You can find **work examples and case studies** of these projects, and more, by visiting joshlambert.xyz/work

Technology Stack Experience

PHP, JavaScript, Titanium, Laravel, Linux, Linode, Git, Asana, AWS
(and a whole lot more, these are the ones I'm passionate about right now!)
